SUMMARY

Automation and Software Engineer who ships production UiPath RPA bots, Salesforce data pipelines, and Power BI dashboards at Indosat Ooredoo Hutchison. Adds applied machine learning (YOLO, MobileNetV2; 85–96% accuracy) and backend engineering (FastAPI, Laravel, Node.js, Docker). Telkom University Information Systems graduate (GPA 3.95/4.00) and Bangkit Academy Distinction Graduate.

WORK EXPERIENCE

Indosat Ooredoo Hutchison — Jakarta, Indonesia
Tech Plan & Project Tracking Intern, BSD – National Customer Success (NCS) — *Apr 2026 – Present*

- Launched **Proactive Surprise Care Network (PAS Care)** to production, now processing 800–1,000+ transaction records every week to notify customers with degraded network quality before they complain, by building the UiPath REFramework bot end to end and a Power BI dashboard to track its results.
- Eliminated manual data handling in the weekly **CX Roaming Heatmap**, keeping the dashboard consistent and current, by automating the full flow from the Salesforce backend through processing to the final dashboard.
- Delivered the **HiFi Air Digital Ecosystem** (final project) through deployment and UAT with real field agents by building HiFi Chain, a supply-chain web app, and FITA 2.0, a mobile app for salespeople and Account Executives.
- Owned the request pipeline for internal tooling and automation across the NCS group, from stakeholder intake and solutioning to deployment.

Human Plus Institute — Jakarta, Indonesia
Machine Learning Engineer Intern — *Jun 2025 – Sep 2025*

- Achieved 85% detection accuracy for warehouse KPI monitoring and real-time traffic detection by building and deploying YOLO-based computer vision models.
- Reduced manual labeling time and cost by designing and running the full dataset pipeline, covering data collection, cleaning, and annotation.
- Made models production-ready by containerizing them with Docker, serving them via FastAPI/Flask APIs, and automating CI/CD with GitHub Actions.

PROJECTS

Barbershop Financial Management System | *Freelance* | *Laravel, REST API* — *Sep 2025 – Nov 2025*

- Gave the client real-time financial visibility by building a Laravel system with a custom REST API syncing live data.
- Owned the full lifecycle as sole developer, from requirement gathering through deployment and user training.

Gloo – Daily Blood Sugar Management App | *Bangkit Academy* | *TensorFlow, MobileNetV2* — *Sep 2024*

- Achieved 96% model accuracy by training and deploying a MobileNetV2 model on 1,046 images I curated and labeled.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, SQL
RPA & Automation: UiPath (REFramework), Process Automation, Workflow Orchestration, Salesforce Integration
ML & AI: Computer Vision (YOLO, MobileNetV2), Deep Learning, Data Preprocessing, Model Evaluation
Backend: FastAPI, Flask, Node.js, Express.js, Laravel, RESTful APIs, System Design
Data & DevOps: Power BI, ETL / Data Pipelines, Docker, GitHub Actions, Git, Jupyter Notebook, Swagger

EDUCATION

Telkom University — Bandung, Indonesia
Bachelor of Information Systems | GPA 3.95 / 4.00 | Outstanding Student Award (Faculty level) — *Sep 2022 – Sep 2026*

CERTIFICATIONS & TRAINING

Certified Associate Data Scientist | BNSP (National Professional Certification Agency) — *Oct 2025*
Bangkit Academy 2024 – Machine Learning Path | Distinction Graduate, top 10% of 4,000+ — *Sep 2024 – Dec 2024*

LEADERSHIP & ORGANIZATION

AIESEC in Bandung | *Coach, AIESEC Future Leaders* — *Nov 2023 – Feb 2024*

- Delivered the AIESEC Future Leaders event by leading an 11-member team from planning to execution.

AIESEC in Bandung | *Committee Member, Finance & Customer Experience* — *Feb 2023 – Jan 2024*

- Closed the project profitably for 80+ attendees by managing its budget, cash flow, and financial reporting.
